# APIC Minnesota's Basic Infection Prevention Course

## April 18–20, 2012

### Targeted Audience

This interactive course will offer a comprehensive foundation for professionals specializing in infection prevention in all settings of health care including: Acute Care, Ambulatory Care, Home Care, Long Term Care, and Public Health

### Participants will:

- Examine the elements of effective infection prevention programs and the resources that support them.
- Gain understanding of how evidenced-based recommendations are used to implement best practices to prevent infections.
- Sharpen networking skills with colleagues to share experience and to gain access to additional resources.
- Increase awareness of Centers for Medicare and Medicaid's conditions of participation to quality for 3rd party reimbursement.
- Expand knowledge of compliance with state and national regulatory standards that impact your facility's licensure or accreditation.
- Improve understanding of the impact of infection prevention strategies to support the mission and goals of your healthcare system.

### Continuing Education Credits

This program has been designed to meet continuing nursing education credits. A certificate of attendance for 20 contact hours will be given to each participant at the course conclusion.

### Course Instructors

Certified (CIC) preventionists from a variety of settings will provide the instruction. Mary Larweck, RN, MS, CIC, will facilitate the course.
